(1) Rated power of the module at STC will not exceed the Power Optimiser Rated Input DC Power. Modules with up to +5% power tolerance are allowed.

(2) For installations after August 1st, 2024, the Rated Input DC Power for S440 is 520W.

(3) For installations after September 1st, 2024, the Rated Input DC Power for S500 and S500B is 550W.

(4) For other connector types please contact SolarEdge. Please note that with other connector types, the wire length will be 0.16m. The Sense Connect feature will not detect thermal events on these connectors.

(5) Power derating is applied for ambient temperatures above +85°C for S440 and S500, and for ambient temperatures above +75°C for S500B and S650B. For details, refer to the [Power Optimisers Temperature Derating](#) technical note.
